

PHARMACEUTICAL SERVICES

SPECIALIZED INDUSTRY SOLUTIONS

- Extensive pharmaceutical industry coverage for the most pertinent results.
- Cost-effective, global screening and in-use solutions.
- Add targeted pharmaceutical web coverage to expand your search.

With literally millions of pharmaceutical trademarks in use around the world, including marks not officially registered, pharmaceutical trademark research presents unique challenges. We can help you meet those challenges with a range of trademark screening and clearance search services that meet the specialized needs of pharmaceutical brand owners.

SPECIALIZED KNOWLEDGE

As a regulated, global healthcare industry, the pharmaceutical industry has trademark dynamics that are unique. Our dedicated Pharmaceutical Research Team understands those dynamics. These seasoned analysts have specialized training and expertise that enables them to skillfully analyze and evaluate the pharmaceutical industry's unique, expanded criteria for confusingly similar marks and drug names.

U.S. FULL PHARMACEUTICAL SEARCH

To provide the most relevant results for pharmaceutical trademarks, we combine our U.S. Full Search with additional specialized pharmaceutical industry sources. Our expert pharmaceutical analysts search a range of key industry sources, including:

- IMS Health Pharmaceutical In-Use
- WHO and USAN stems
- American Drug Index
- Physicians Desk Reference
- National Drug Data File (includes strength, dose and type)
- Drug Topics Redbook (includes strength, dose and type)

U.S. FULL PHARMACEUTICAL SEARCH XC

This search extends our standard coverage to give you the most comprehensive pharmaceutical coverage. It streamlines your clearance process by providing more relevant results, reducing the need for follow-up research. Extended coverage includes:

- FDA Orange Book
- Cerner Multum Lexicon
- National Drug Code Directory
- CenterWatch (Pipeline Drugs and Study Results)
- Pharmaceutical News Sources (includes Pharmaceutical News Index, DIOGENES FDA, Regulatory Updates, and EMBASE Biomedicine Database, among others)

PHARMACEUTICAL SCREENING SEARCHES

Multi-Country Screening Search for Pharmaceuticals

The Multi-Country Screening Search for Pharmaceuticals combines our Multi-Country Screening Search plus the Pharmaceutical In-Use Screening Search.

Multi-Country Screening Search provides in-depth record content and trademark status information from more than 40 key registers around the world, (when available). Pharmaceutical In-Use Screening Search provides drug name, distributor, and sales information for identical, phonetically identical and closely similar trademarks from 73 countries.

Identical Screening Search (ISS) for Pharmaceuticals

A fast, cost-effective way to perform identical screening searches for pharmaceutical marks in more than 200 jurisdictions. Choose the coverage you need—country, region or worldwide—with expanded coverage for coined pharmaceutical terms.

WEB SEARCH EXTENSIONS FOR PHARMACEUTICALS

Web Search Extensions provide focused coverage of key trademark-rich websites for the pharmaceutical industry. Complement your Full Search with our Pharmaceuticals Web Search Extension or Over-The-Counter Pharmaceuticals Web Search Extension.
